

Quiet coast

A study in distance, surface and light.

AI-generated imagery. Not a photographer's commissioned work.

Three ways of looking.

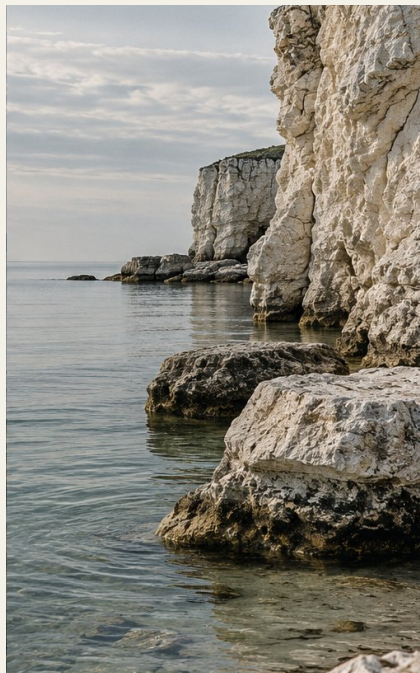

A wide view establishes a place.

A close detail changes the pace.

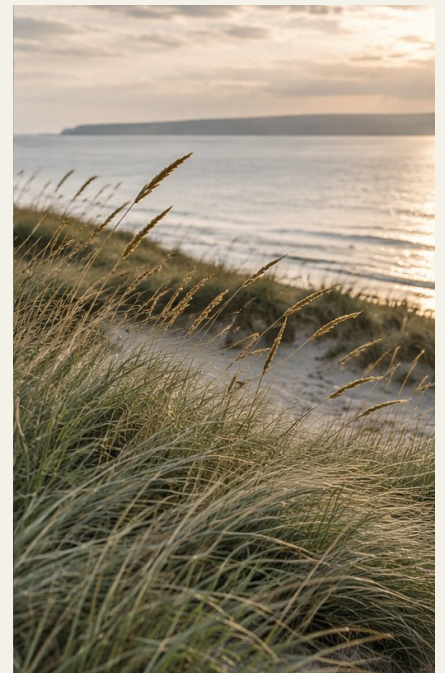

A foreground gives depth to the closing frame.

DISTANCE

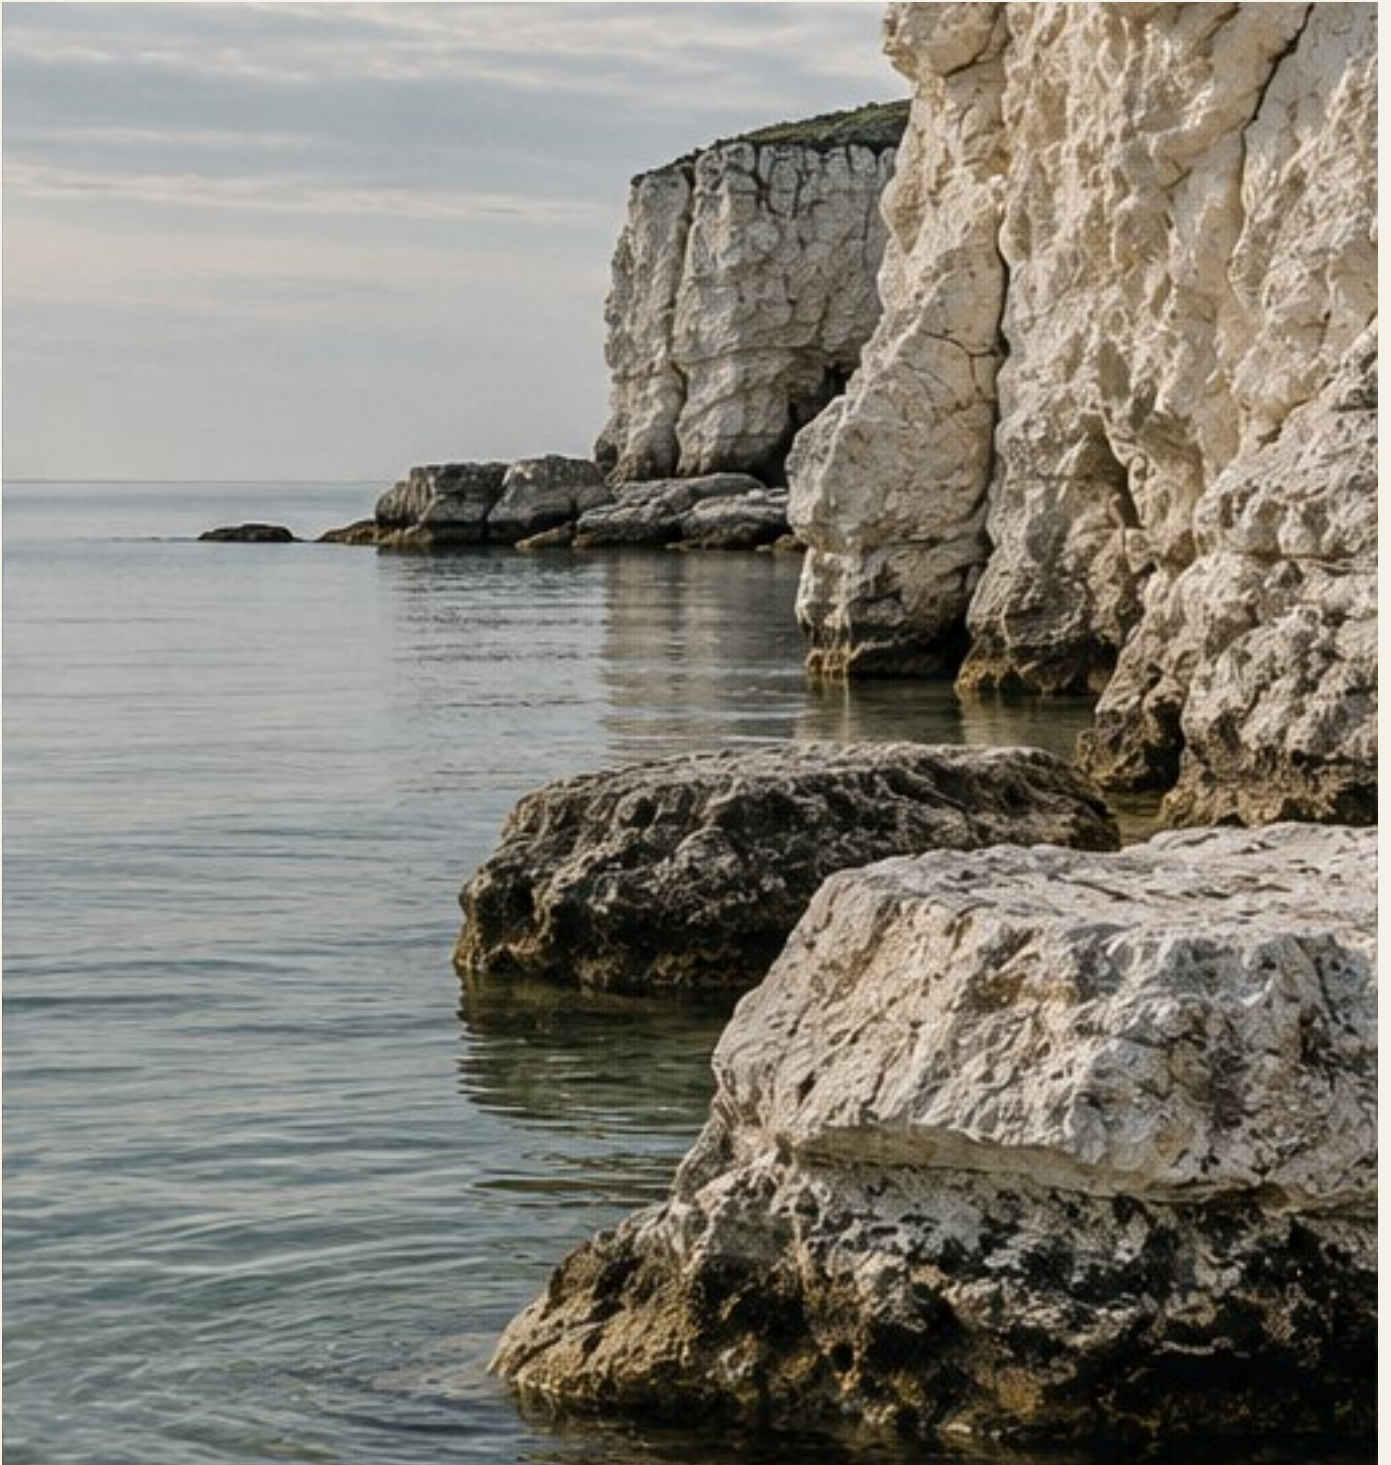

SURFACE

LIGHT

A line between sea and sky.

Texture changes the scale.

Light gives the sequence its ending.

Let the edit breathe.

A photography portfolio can be short and deliberate.
Choose images that work together, vary the scale
and leave enough space to make the sequence clear.

ABOUT THESE IMAGES

This fictional demonstration uses AI-generated coastal imagery created for Portfolia. It is not a real shoot, customer portfolio or claim of photographic authorship.
